# INDEX

Acetylcholine
  action in cerebral cortex 368, 375
  action in nucleus reticularis thalami neurons 357
  action in thalamic relay neurons 352
  activated ionic currents in cochlear hair cells 502
  Alzheimer's disease 519, 521
Acetylcholine receptor, muscarinic
  in brain in Alzheimer's disease 523
  G protein activation of $K^+$ channels 231
  seizures and arousal 171
Acoustic stimulation, hair cell excitability 497
Actin filaments, synaptic vesicle domain, axon terminals 465, 468
Adenosine
  action in cerebral cortex 370
  action in thalamic relay neurons 353
Adenosine monophosphate deaminase 549
  ATP formation in muscle 551
  deficiency in erythrocytes 555
  deficiency in muscle 554
  operation and role of purine nucleotide cycle 551
  regulatory mutations in liver 555
Adenosine triphosphate, in muscle, regeneration via purine nucleotide cycle 551
Adenylosuccinate lyase 548
  deficiency 556
  operation and role of purine nucleotide cycle 551
Adenylosuccinate synthetase 548
  operation and role of purine nucleotide cycle 551
Adenylyl cyclase, regulation by G protein subunits 235
α-Adrenergic receptors, cerebral cortex 371
β-Adrenergic receptors
  cerebral cortex 371
  thalamic neurons 356, 360
Afferentation of optical control systems 103
Alanosine 548
Alzheimer's disease 518
  animal models 525
  drug therapies 533
  excitatory amino acid receptors 114, 523
  neurotransmission 519
Ameboid microglial cells 30
*trans*-1-Amino-1,3-cyclopentane dicarboxylate receptor, vertebrate CNS 301
  calcium mobilization 307
1*S*,3*R*-Aminocyclopentyl-1,3-dicarboxylate 115
α-Amino-3-hydroxy-5-methyl-4-isoxazolepropionic acid receptors, vertebrate CNS 117, 147, 299
  calcium mobilization 306
  desensitization 314
2-Amino-4-phosphonobutyrate receptors, vertebrate CNS 301
  densensitization 319
2-Amino-5-phosphonovaleric acid, effect on LTP in neocortex 219
Ammonia, purine nucleotide cycle in kidney and brain 553
Ammonium ions
  catecholaminergic systems 149
  detoxification 137
  excitatory synaptic transmission 141
  inherited and acquired hyperammonemic disorders 137
  inhibitory synaptic transmission 147
  neuronal membranes 138
  physico-chemistry and distribution 136
  serotoninergic system 148
  sources 136
Amphetamine, male sexual behaviour 258
β-Amyloid protein 525
Anesthetics, effect on NMDA receptor 298
Angiotensin II, in birds 179–207
  centrally mediated physiological actions 189
  control 180
  responsive neurones 194
  specific systems in rostral brainstem 180
Angiotensin II receptors, duck brain 184
Antidiuretic hormone, birds, angiotensin II 192
Aphagia, 6-hydroxydopamine induced 249, 253
Aphasia, somatostatin in brain 522
Apomorphine, male sexual behaviour 258
Apoptosis 2
APPA, Alzheimer's disease 535, 537
Arachidonic acid, modulation of $G_K$-gated cardiac $K_{ACh}$ channel 242
Arecoline, effect on Alzheimer's disease 534
Arousal systems and seizures 160
Artificial intellect 56, 101, 107
Ascending neuromodulatory transmitter systems 375
Aspartate
  action in cerebral cortex 365
  Alzheimer's disease 523
Aspiny nonpyramidal neurons 564, 592, 600
Asymmetric synapses 564, 590, 597
Asymmetry 507
  gross volumetric 508
  histologic cellular basis 509
  interhemispheric connectivity 512
  ontogeny 510
Atrial natriuretic factor, birds 196
Audiogenic seizures 158
Automatic control theory 56
Automatic movements 45–112
  central pattern generators 48, 58
  computational abilities of brain 92
  formation of real behavioral programs 98
  optimal control systems 76, 80
  spinal motor control system 66
Automatons 56
Avoidance behaviour, dopamine 265
Axoaxonic synapses, pyramidal cells 575
  chemical characteristics 583
  number and distribution 576
  sources 580
Axodendritic and axospinous synapses
  chemical characteristics 597
  morphology 583
  number and distribution 584
  sources 589

Axosomatic synapses, pyramidal cells
chemical characteristics 574
morphology 570
number 571
sources 574
Axon terminal, cytoplasmic structure
conventional electron microscopy 444
direct-freeze technique 445
mitochondrial domain 446
synaptic vesicle domain 449

Baclofen, seizures and arousal 162, 167
Barrel cortex 390
anatomy of vibrissal sensory pathway 390
invasion of nonvibrissal inputs 407
neuronal responses 397
plasticity 398, 406
plasticity, ontogenetic development 408
plasticity, use dependent 413
Basket cells 569, 574
Beaded fibers 440
Behaviour, dopamine functions 247–279
Behavioral program formation in cerebral cortex 97
Bethanechol, effect on Alzheimer's disease 533
Bicuculline, seizures and arousal 163, 167
Birds, angiotensin II responsiveness 179–207
Blood pressure, birds, angiotensin II 190
Brain
computational abilities 92
optimal control system 91, 93
purine nucleotide cycle 553
Brainstem
angiotensin II specific systems, birds 180, 195
origin of peptide containing axons in cerebellum 438
seizure regulation 157
Burster-driving neurons 619
Burst generating cells, cerebral cortex 362
Burst-tonic neurons, interstitial nucleus of Cajal 614, 616, 620, 622

Cajal-Retzius cells, fate of 29
Calbindin neurons, developing brain, cell death 24
Calcitonin gene-related peptide, in cerebellum mossy fibers 435
Calcium
activated K current in cochlear hair cells 498
delayed excitotoxicity 309
desensitization of glutamate receptor 312
glutamate release, effect of ammonium ions 143
mobilization and glutamate receptors 305
modulation of ion channels 310
permeability of non-NMDA receptors 123
role in long-term depression 219
synaptic plasticity 308
Calcium current, voltage-gated, cochlear hair cells 498
Callosal fibers, embryonic development 11
Calspectin, role in LTP 222
Catecholaminergic systems, effect of ammonium ions 149
Cell death 1
chick embryos 79
control of cell numbers 28
cortical afferents 20
cortical subplate and future subcortical white matter 8
formation of cerebral convolutions 30
innervation of targets 20
molecular layer 29
morphology of dead cells 2
neurons? 19
neurotransmitters and neuropeptides 23
species differences 6
telencephalic mantle of developing rat 2
transitory cortical efferents 20
transitory phagocytes 29
Central medial intralaminar nucleus, seizures and arousal 162
Central pattern generators
afferent correction 53
interaction with afferent flow 58
optimal control systems 76
organization 48
Cerebellum
peptides in 423–442, 476, 477, 483
brainstem origin 438
cholecystokinin 431
corticotropin releasing factor 429, 477
enkephalin 424
species differences 432
role in eye movement control 633
role in seizures 156
serotonin 476, 486
spinal optimal control system signals 87
Cerebral asymmetry 507
Cerebral convolutions, cell death 30
Cerebral cortex
cell death 1–43
electrophysiological properties of neurons 361
neurons and synapses in 564
neurotransmitters 364, 373, 568
synapses on axon initial segments 575
synapses on cell soma 570
synapses on dendritic shafts and dendritic spines 583
Chandelier cells 569, 581
chemical characteristics 583
Chick, cell death in embryos, ionic currents in cochlear hair cells 494
Chloride, effect on activation of $K_{ACh}$ channels 244
Cholecystokinin, in cerebellum 431, 432, 438, 440
Cholinergic nuclei, seizures and arousal 167, 171
Cholinomimetics, Alzheimer's disease therapy 533
Climbing fibers
corticotropin releasing factor 478
peptides in, species differences 437, 440
*Clione limacina*, locomotor generators 51, 77
Cochlear hair cells, ionic currents 493–505
Coformycin 550
Computational abilities of the brain 92
Concanavalin A, glutamate receptor desensitization 317, 322
Controlled object
cause-effect model 94
internal model 70, 103
motor automatisms 76
neural mechanisms 74
Corpus callosum, interhemispheric connectivity, asymmetry 512
Cortical afferent fibers 594
Corticocortical fibers 597

Corticotropin releasing factor
in cerebellum 429, 432, 437, 438, 440, 484
interaction with enkephalin 482, 486
physiological effects 477
in chandelier cells 583
D-Cycloserine, effect on Alzheimer's disease 535
Cytoplasmic structure of axon terminals 443–474
Cytoskeletal proteins, role in LTP 222

Deep etching, axon terminals 446, 449, 454–457
Defensive behaviour, dopamine 264–269
Delayed rectifier $K^+$ current, in cochlear hair cells 499
Dementia 517
Dendritic shafts and spines, pyramidal cells, synapses on 583
Deoxyglucose, mapping of functional activity of barrel cortex 405
Desensitization, glutamate receptor 311
Development
cell death and removal in cerebral cortex 1–43
cerebral asymmetry 510
LTP in visual cortex 212
plasticity in barrel cortex 408
thyroid receptors in brain 282
Diencephalic dopamine system 248, 271
Dopamine
action in cerebral cortex 371
Alzheimer's disease 520
effect of ammonium ions on turnover 149
defensive behaviour 264–268
feeding behaviour 250–258
male sexual behaviour 258–264
sensorimotor syndrome 249
systems in brain 248
theoretical analysis of function 268
Dopamine agonists
consummatory behaviours 253
male sexual behaviour 258
Dopamine antagonists
consummatory behaviours 250
defensive behaviour 264
male sexual behaviour 259
Dopamine receptors 248
behaviour 271
Double bouquet cells 569, 593, 599
Drinking, birds, angiotensin II 189
Ducks, angiotensin II receptors in brain 184

Embryo, rat, thyroid hormone levels 282
Embryonic motility 79
Enkephalin
in cerebellum 424, 432, 438, 440, 485
interaction with corticotropin releasing factor in cerebellum 482, 486
physiological effects in cerebellum 480
Entrainment of central rhythm 78
Epileptic seizures, mesencephalic and thalamic arousal systems 155–178
Excitatory amino acids
action in cerebral cortex 365, 373
in cerebellum
corticotropin releasing factor interaction 477
5-hydroxytryptamine interaction 489
interaction with NMDA receptor 298
Excitatory amino acid receptors 113–133
G-protein-linked metabotropic receptors 114
NMDA 125
non-NMDA 117
Excitatory neurotransmitter, glutamate in vertebrate CNS 302
Excitatory synaptic transmission, effect of ammonium ions 141
Excitotoxins
animal models of Alzheimer's disease 525
glutamate 304
calcium 309
Extrapyramidal system, seizure regulatory sites 155
Eye movement, integration 610
horizontal, nucleus prepositus hypoglossi 613, 626
parametric modulation 633
selective impairment 619
vertical, interstitial nucleus of Cajal 613, 624

Feeding behaviour, dopamine 250–258, 269
Fetal brain, thyroid hormone levels 282
Filamentous strands
mitochondrial domain, axon terminals 447
synaptic vesicle-associated, axon terminals 450, 467
*cis*-Flupenthixol, male sexual behaviour 259
Freeze-substitution, axon terminals 445
Freezing responses, dopamine 266
Fulminant hepatic failure 137, 147

GABA
action in cerebral cortex 366, 373
action in nucleus reticularis thalami neurons 357
action in thalamic relay neurons 351, 359
Alzheimer's disease 520
axodendritic and axospinous synapses 599
axosomatic synapses 574
chandelier cells 583
cerebral cortex cells 568
corticotropin releasing factor interaction in cerebellum 478
5-hydroxytryptamine interaction in cerebellum 486, 489
seizures and arousal 161
GABA conductance, effect of calcium 311
GABAergic interneurons, thalamocortical circuit 339, 351
GABA receptors
barrel cortex 414
cerebral cortex 366
thalamic relay neurons 351, 359
Glial cells
calcium mobilization 308
glutamate receptors 302
GluR1-GluR4 121
Glutamate
action in cerebral cortex 365, 568
action in nucleus reticularis thalami neurons 357
action in thalamic relay neurons 350
Alzheimer's disease 523, 535
axodendritic and axospinous synapses 599
calcium mobilization 305
excitatory neurotransmitter 302
excitotoxin 304

mediator of synaptic plasticity 303
modulator of ion channels 302
neuronal morphology 304
Glutamate-binding protein 129
Glutamate metabotropic receptor
barrel cortex 413
cerebral cortex 366
thalamic relay neurons 351
Glutamate receptors
effect of ammonium ions 147
barrel cortex 413
in brain in Alzheimer's disease 523, 525, 535
invertebrate, desensitization 319
role in LTP 221
vertebrate CNS 297
2-amino-4-phosphonobutyrate 301
calcium mobilization 305
desensitization 311
glial 302
kainate 299
NMDA 297
quisqualate 299, 301
Glutamatergic transmission, effect of ammonium ions 141
Glutamine synthetase, ammonia removal by brain 138
Glycine, NMDA receptor desensitization 313
Glycine site, NMDA receptors 126
G protein
activation of cardiac muscarinic $K^+$ channels 229–246
effect on ATP-sensitive $K^+$ channel 238
ion channels regulated by 231
linked excitatory amino acid receptors 114
role in LTP 221
subunits 235
Gyri, formation, cell death 30

Hadacidin 548
Hair cells, cochlear 493
excitability 497
ionic currents 498
Haloperidol, male sexual behaviour 259
Heart, G protein activation of muscarinic $K^+$ channels 229–246
Heparin, modulation of $G_K$-gated cardiac $K_{ACh}$ channel 244
Hepatic encephalopathy 137, 138, 148
Hippocampus
Alzheimer's disease 525
long-term potentiation 213
Histamine
action in cerebral cortex 371
action in thalamic relay neurons 355
Horizontal eye movement, nucleus prepositus hypoglossi 613, 626
6-Hydroxydopamine
defensive behaviour 267
male sexual behaviour 260
sensorimotor syndrome 249, 253
5-Hydroxyindole acetic acid, Alzheimer's disease 519, 521
5-Hydroxytryptamine
action in cerebral cortex 371
action in nucleus reticularis thalami neurons 358
action in thalamic relay neurons 357, 360
Alzheimer's disease 519, 521
effect of ammonium ions on synthesis 148
cerebellar afferents 476
in cerebellar circuitry 486
5-Hydroxytryptamine neurons, raphe nuclei 376
5-Hydroxytryptamine receptor
Alzheimer's disease 535
in cerebellum 487
Hyperammonemias 137, 142, 147, 148
Hyperuricemia, liver AMP deaminase 555

Idiotype-antiidiotype interactions 105
Ifenprodil 126
Immune system, optimal control system 104
Imprinting 98
Inferior colliculus, seizures 158
Inhibitory synaptic transmission, effect of ammonium ions 147
Inosine monophosphate metabolism 548, 550
Instinct and learning 98
Integration, oculomotor system 610
horizontal, nucleus prepositus hypoglossi 613, 626
neuronal model 612
parametric modulation 633
vertical, interstitial nucleus of Cajal 613, 624
Interstitial nucleus of Cajal
anatomical connections 613
eye movement deficits after lesions 619
REM sleep 621
signals carried by neurons in 614
sinusoidal vertical linear acceleration 622
vertical neural integrator 613, 624
Ionic channels
cochlear hair cells 493
ACh-activated currents 502
$Ca^{2+}$-activated $K^+$ current 498
cell-specific distribution of $K^+$ channels 502
delayed rectifier 499
inactivating K current 501
inward rectifier 500
voltage-gated calcium current 498
receptor operated 229, 230, 302
vertebrate CNS, effect of glutamate 302

Kainate-binding protein 119
Kainate receptors, vertebrate CNS 117, 123, 299
calcium mobilization 306
desensitization 314, 318
Kidney, purine nucleotide cycle 553

Large dense core vesicle, mitochondrial domain, axon terminals 447, 448
Lateral geniculate nucleus 339, 348
neurotransmitter actions 350, 357
Lateralization of function 507
Laterodorsal tegmental nuclei, seizures and arousal 167, 171
Learning
animal models of Alzheimer's disease 525
instinct 98
optimal control system 83, 102
Lectins, effect on quisqualate receptor desensitization 317, 321
Leukotriene C4, modulation of $G_K$-gated cardiac $K_{ACh}$ channel 242

Limbic system, role of 99
Liver
  ammonia detoxification 137
  purine nucleotide cycle 552
Liver failure, hyperammonemia 137, 148
Local-circuit neurons, cell death 23
Locomotor generator 49, 59, 76
Long-term depression 210
  excitatory amino acid receptors 114
  glutamate receptors 304
  heterosynaptic 216
  homosynaptic 211, 216
  in neocortex, functional significance 222
  in neocortex, mechanisms 217
Long-term potentiation 210
  associative 215
  excitatory amino acid receptors 114, 120, 126
  developing visual cortex 212
  glutamate receptors 303
  homosynaptic 210, 214
  in neocortex, functional significance 222
  in neocortex, mechanisms 217
  in somatosensory and motor cortices 214

Magnesium, NMDA receptors 126, 147, 297
Memory
  animal models of Alzheimer's disease 525
  role of limbic system 99
Mesencephalic arousal systems, role in seizures 167
Mesotelencephalic dopamine system 248
*N*-Methyl-D-aspartate induced currents, effect of ammonium ions 145
*N*-Methyl-D-aspartate receptors
  barrel cortex 413
  in brain in Alzheimer's disease 523, 524, 525, 535
  cerebral cortex 365
  learning and memory 527
  role in LTP in neocortex 218
  thalamus 350, 359
  vertebrate CNS 297
    biochemistry 127
    calcium mobilization 305, 307
    desensitization 312, 319, 320
    molecular biology 128
    pharmacology 125
Metoclopramide, defensive behaviour 265
Microglial cells, removal of dead cells 29
Microgyria 30, 35
Microtubule-associated proteins, axon terminals 447
Microtubules, mitochondrial domain, axon terminals 446, 448
Mitochondria, axon terminals 446
MK-801
  binding to NMDA receptor 126
  effect on LTP in neocortex 219
Molecular layer, cell death 29
Mossy fibers, cerebellum, peptides in 424, 439, 431, 432, 440
Motor automatisms 57
Motor cortex, LTP 214
Motor systems, seizure regulatory sites 155
Muscarinic $K^+$ channels, heart, G protein activation 230–246
Muscarinic receptors
  in brain in Alzheimer's disease 523
  seizures and arousal 171
Muscimol, seizures and arousal 161
Muscle
  AMP deaminase deficiency 554
  purine nucleotide cycle 551
Myoadenylate deaminase deficiency 554
Mystacial vibrissae 390

Naloxone, enkephalin interaction 480, 486
NDP-kinase, modulation of $G_K$-gated cardiac $K_{ACh}$ channel 242
Neocortex
  LTP and LTD 209–228
  synaptic inputs on pyramidal neurons 563–607
Neostigmine, seizures and arousal 171
Neural integrator, oculomotor system 613
Neural optimal control system 68, 76
Neurocomputers 56, 107
Neurofilaments, mitochondrial domain, axon terminals 446
Neuromodulatory transmitter systems, thalamocortical activity 375
Neuronal membranes, effect of ammonium ions 138
Neurons
  angiotensin II responsive, birds 194
  cerebral cortex 564
  glutamate receptors and morphology 304
Neuropeptides
  cell death 23
  cerebellar afferents 476
Neuropeptide Y, developing brain, cell death 23
Neurotransmission
  Alzheimer's disease 519
  changing concepts 476
Neurotransmitters, cerebral cortex 568
Nicotinic receptors, seizures and arousal 171
Nigrostriatum, dopamine and behaviour 271
Nigrotectal projection, seizures 156
Noradrenaline
  action in barrel cortex 413
  action in cerebral cortex 371
  action in nucleus reticularis thalami neurons 358
  action in thalamic relay neurons 355
Nucleus accumbens, dopamine and behaviour 271
Nucleus basalis of Maynert neurons 376
Nucleus prepositus hypoglossi
  anatomical connections 626
  eye movement deficits after lesions 632
  horizontal neural integrator 613, 626
  signals carried by neurons in 629

Oculomotor system, neuronal substrate of integration 609–639
Oncogene erbA, triiodothyronine receptors 287
Optimal control systems 66, 68, 74
  afferentation 103
  automatisms 76
  brain 93
  cerebellum 87
  complexity 80
  decomposition 82
  development of theory 101
  formation of real behavioral programs 98

hierarchical organization 81
immune system 104
learning process 104
neural base 84
stretch-reflex system 85
visceral brain 99
Optokinetic response 610, 618, 619
Osmoregulation, birds, angiotensin II 179

Pacemaker activity of neurons, locomotor behavior 52
Paraventricular nucleus, birds, angiotensin II and salt/fluid balance 198, 202
Penicillin epilepsy 159
Peptidergic neurons, cell death 23
Peptides in cerebellum 423–442, 477
brain stem origin of axons 438
cholecystokinin 431
corticotropin releasing factor 429
enkephalin 424
species differences 432
Pertussis toxin sensitive G proteins 230
pH, ammonium ion effects 136
Phagocytes, removal of dead cells during development 29
Phencyclidine, binding to NMDA receptor 126
Phenytoin, Purkinje cells 157
Phosphatidylinositol, role in LTP 221
Phospholipase A2, role in G protein activation of muscarinic $K^+$ channel 237
Physostigmine, effect on Alzheimer's disease 534
Pimozide, feeding behaviour 251
Piperidine-4-sulfonic acid, seizures and arousal 163, 167
Plasticity, barrel cortex neurons 389, 398–422
functional 406
ontogenetic development 408
structural 398
use-dependent 408
Polyamines, effect on NMDA receptor 298
Polyamine site, NMDA receptors 126
Polymicrogyria 30
Ponto-geniculate-occipital waves 375
Pontomesencephalic cholinergic nuclei, seizures and arousal 167
Postero-medial barrel subfield 390, 393
Potassium
conductance in cerebellum, effect of enkephalin 486
depletion by ammonium ions 140
Potassium channels
cochlear hair cells 493
acetylcholine activated 502
calcium activated 498
cell-specific distribution 502
delayed rectifier 499
inactivating 501
inward rectifier 500
heart, ATP-sensitive, effect of G protein 238
heart, muscarinic
desensitization 239
G protein activation 230, 231
G protein subunits 233
modulation 242
Potassium conductances
effect of calcium 310
effect of enkephalin 486
Protein 4.1, role in LTP 222
Protein kinase A, phosphorylation of $K_{ACh}$ channel 242
Protein kinase C, in neocortex, role in LTP 219
Protein kinase II, in neocortex, role in LTP 219
Purine nucleotide cycle
connections 550
enzymes 547
molecular defects 554
operation and role of 551
Purkinje cells
learning device 90
peptide effects 477
phenytoin action 157
serotonin effects 487
Pyknosis 2
Pyramidal cells 564, 565
atypical 567
axodendritic and axospinous synapses 583
axon initial segment synapses 575
axosomatic synapses 570
innervation by aspinynonpyramidal cells 606
synaptic inputs 569
typical 566

Quisqualate-induced currents, effect of ammonium ions 145
Quisqualate receptors, vertebrate CNS 114, 299
calcium mobilization 306
desensitization 314, 320

*ras* p21-GAP, modulation of $G_K$-gated cardiac $K_{ACh}$ channel 244
Re-entrant cortical integration 48
Reflex theory 47
Reflexive eye movements 610
Renin-angiotensin system, birds 180
Reticularis thalami cells 339
neurotransmitter actions 350, 357
spindle oscillations 345
Reye's syndrome 137
Rhythm entrainment 78
Rhythm generation
cerebral cortex 363
mechanisms 53, 57
Rhythmic burst firing, thalamic relay neurons 341
Ricin 528
Rostral brainstem, angiotensin II specific systems, birds 180, 195
RS-86 533

Saccades 610
discharge characteristics of related neurons 614
Salt and fluid balance, birds, angiotensin II 179, 189, 196, 198, 202
Salt gland, birds, angiotensin II 193
SCH 23390
feeding behaviour 251
male sexual behaviour 259
Scratching generators 59
Secretogranin II, in cerebellum mossy fibers 435
Seizures
arousal systems 160
motor systems 155
sensory systems 158

sites of origin 159
subcortical arousal systems 155–178
Self-learning, optimal control systems 102
Self-organization, evolution of optimal control systems 102
Sensorimotor syndrome, dopamine function 249
Sensory information processing, spinal motor control system 68
Sensory seizures 158
Serotoninergic system, effect of ammonium ions 148
Sexual behaviour, dopamine 258–264, 269
Sinusoidal vertical linear acceleration, vestibulo-ocular reflex 622
Sleep
epileptic seizures 160
neurotransmitter actions in thalamic neurons 340, 375, 376
REM, interstitial nucleus of Cajal 621
Smooth endoplasmic reticulum, mitochondrial domain, axon terminals 446, 449
Somatosensory cortex
functional plasticity 406
long-term potentiation 214
neuropeptides and cell death 24, 27
ontogenetic development of plasticity 408
structural plasticity 398
use-dependent plasticity 408
Somatostatin, Alzheimer's disease 522
Somatostatin-immunoreactive neurons, in developing brain, cell death 24
Species differences, peptides in cerebellum mossy fibers 432
Speech, learning 99
Spiking cells, cerebral cortex 362
Spinal cord, seizure regulation 158
Spinal motor control system 66
as a neural network 72
sensory information processing 68
Spindle oscillations, thalamic neurons 344
Spino-cerebellar tracts 88
Spiny neurons 564, 592
Spiperone, effects in cerebellum 489
Stretch-reflex system 85
Subcortical white matter, cell death 5, 8
Substance P, in developing brain, cell death 24
Succinylpurines, accumulation in adenylsuccinate lyase deficiency 556
Suicide transport agents 527
Swimming, locomotor generators 49, 77
Synapses, in cerebral cortex 564
asymmetric 564, 590, 597
on axon initial segments 575
on cell soma 570
on dendritic shafts and spines 583
modification 210
symmetric 564, 585, 599
Synapsin I 450, 467, 469
Synaptic circuitry 569
Synaptic inputs on pyramidal cells 569
Synaptic plasticity, glutamate 303
calcium 308
Synaptic transmission
excitatory, effect of ammonium ions 141
inhibitory, effect of ammonium ions 147
Synaptic vesicles, axon terminals
actin filament 468
associated filamentous strands 450, 467
conventional electron microscopy 444
deep-etch profile 449
direct-freeze technique 445
granular materials in 468
membrane particles 449
Synaptophysin 450, 469

Target-dependent cell death 20
Telencephalic mantle, developing rat, distribution of dead cells 2
Tetrahydroaminoacridine 533
Thalamic arousal systems, role in seizures 161, 171
Thalamic fibers, embryonic development 11
Thalamocortical afferent fibers 594
Thalamocortical circuit 339
Thalamus 337
electrophysiological properties of neurons 340
neurotransmitter actions in nucleus reticularis neurons 357
neurotransmitter actions in relay neurons 350, 359
Thyroid receptors, rat brain 281–294
Thyroxine, rat brain during development 282
Tonic neurons, interstitial nucleus of Cajal 614, 616, 620, 622
Transmembrane domains, excitatory amino acid receptors 122
Triiodothyronine, rat brain during development 282
Triiodothyronine receptors
developing brain 283
immunocytochemical localization in brain 286
relationship with cellular products of oncogene erbA 287
*Tritonia diomedea*, locomotor generator 49, 77
Tryptophan, effect of ammonium ions on metabolism 148

(S)UH 301 535
Urea, purine nucleotide cycle in liver 552
Urea cycle disorders 137

Vasointestinal peptide, in developing brain, cell death 23
Vertical neural integrator, interstitial nucleus of Cajal 613, 624
Vestibular stimulation, neuronal responses in interstitial nucleus of Cajal 616
Vestibulo-ocular reflex 610, 616, 619, 622, 634
Vibrissae 390, 398
Vibrissal sensory pathway 390
Vibrissectomy, effect on neurotransmitters 414
γ-Vinyl-GABA, effect on seizures 158, 162
Visceral brain, role of 99
Visual cortex
control of use-dependent plasticity 408, 413
intracortical connections 339
LTD 217
LTP during development 212
neurotransmitter actions 350
synaptic connectivity of pyramidal cells 591
Volkensin 528
Volume transmission 476, 477

Wheat germ agglutinin, glutamate receptor desensitization 317, 321
Whiskers 390, 398
Zinc
effect on AMPA receptors 299
effect on NMDA receptors 126, 297
